

Advanced Genetics Soybean Varieties

AG 4422S R2Y

Maturity:	4.4
Height:	Medium
Plant Type:	Med. Bush
Flower:	Purple
Pubescence:	Gray
Pod Color:	Brown
Hilum Color:	Buff
Seed Size:	2900/lb.
Recommended Row Width:	Narrow or Wide
Phytophthora Race Resistance:	Rps1c
Cyst Nematode Resistance:	R3, MR14

AG 4422S R2Y is a new high yielding early group IV variety from Advanced Genetics with the RoundUp Ready 2 gene and the STS gene stacked. AG 4422S R2Y is a medium height variety with good emergence and good standability. It may be planted in wide or narrow row spacing, on any soil type with an expectation of very good performance. AG 4422S R2Y has excellent yield potential in irrigated cropping systems and the toughness to handle stressful dryland conditions. It offers excellent protection from Soybean Cyst Nematode and good field tolerance to Phytophthora Root Rot.

Agronomic Traits and Disease Resistance

Always follow grain marketing, stewardship practices and pesticide label directions. Roundup Ready® crops contain genes that confer tolerance to glyphosate, the active ingredient in Roundup® brand agricultural herbicides. Roundup® brand agricultural herbicides will kill crops that are not tolerant to glyphosate. Genuity®, Roundup® and Roundup Ready 2 Yield® are registered trademarks of Monsanto Technology LLC used under license. Individual results may vary, and performance may vary from location to location and from year to year. This result may not be an indicator of results you may obtain as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible.
