

# Advanced Genetics Soybean Varieties

## AG 4832S R2X

Maturity:	4.8
Height:	Tall
Plant Type:	Intermediate
Flower:	Purple
Pubescence:	Gray
Pod Color:	Tan
Hilum Color:	Imp. Black
Seed Size:	3000/lb.
Recommended Row Width:	Wide or Narrow Rows
Phytophthora Race Resistance:	Rps1c
Cyst Nematode Resistance:	R3, MR 14

AG 4832S R2X is a new high yielding late group IV variety from Advanced Genetics with the RoundUp Ready Xtend and STS traits stacked. AG 4832S R2X is a tall variety with an intermediate profile that may be drilled or planted in rows. AG 4832S R2X may be planted early or late on any soil type. Due to its height, AG 4832S R2X is best suited to upland soils. This variety offers exceptional top-end yield. AG 4832S R2X offers outstanding protection from Soybean Cyst Nematode, very good protection from Phytophthora Root Rot, excellent resistance to shattering.

### Agronomic Traits and Disease Resistance

Always follow grain marketing, stewardship practices and pesticide label directions. Roundup Ready® crops contain genes that confer tolerance to glyphosate, the active ingredient in Roundup® brand agricultural herbicides. Roundup® brand agricultural herbicides will kill crops that are not tolerant to glyphosate. Genuity®, Roundup® and Roundup Ready 2 Yield® are registered trademarks of Monsanto Technology LLC used under license. Individual results may vary, and performance may vary from location to location and from year to year. This result may not be an indicator of results you may obtain as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible.
