

Advanced Genetics Soybean Varieties

AG 4844S R2Y

Maturity:	4.8
Height:	Medium
Plant Type:	Intermediate
Flower:	White
Pubescence:	Lt. Tawny
Pod Color:	Tan
Hilum Color:	Black
Seed Size:	2800/lb.
Recommended Row Width:	Wide or Narrow
Phytophthora Race Resistance:	none.
Cyst Nematode Resistance:	R3, MR14 (PI 88.788)

AG 4844S R2Y is a high yielding late group IV variety from Advanced Genetics with the RoundUp Ready 2 Yield gene stacked with STS. This is a medium height variety with exception field appearance. AG 4844S R2Y offers very good soybean cyst nematode resistance, an intermediate type growth habit and good tolerance to salt. This variety has topped our yield testing in 2011. AG 4844S R2Y may be planted anywhere late group IV varieties are adapted with the expectation of excellent performance.

Agronomic Traits and Disease Resistance

Always follow grain marketing, stewardship practices and pesticide label directions. Roundup Ready® crops contain genes that confer tolerance to glyphosate, the active ingredient in Roundup® brand agricultural herbicides. Roundup® brand agricultural herbicides will kill crops that are not tolerant to glyphosate. Genuity®, Roundup® and Roundup Ready 2 Yield® are registered trademarks of Monsanto Technology LLC used under license. Individual results may vary, and performance may vary from location to location and from year to year. This result may not be an indicator of results you may obtain as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible.
