

Advanced Genetics Soybean Varieties

AG 4880N RS

Maturity:	4.8
Height:	Med. Tall
Plant Type:	Bush
Flower:	Purple
Pubescence:	Tawny
Pod Color:	Brown
Hilum Color:	Black
Seed Size:	3100/lb.
Recommended Row Width:	Wide
Phytophthora Race Resistance:	1a (1-2, 10-13, 15-19)
Cyst Nematode Resistance:	MR4

AG 4880N RS is a new variety from Advanced Genetics. This late group IV is medium-tall with a bush type growth. In fact, AG 4880N RS has profuse branching that results in good width from top to bottom. This is an extremely high yielding variety with the RR gene and STS gene stacked. AG 4880N RS is very versatile variety that may be planted early or late on any soil type. However, due to its wide growth habit, it is better suited to 30 inch rows than to a drilled environment. AG 4880N RS offers good levels of protection from Phytophthora Root Rot and Soybean Cyst Nema-

Agronomic Traits and Disease Resistance

Glyphosate
Tolerant

Always follow grain marketing, stewardship practices and pesticide label directions. Roundup Ready® crops contain genes that confer tolerance to glyphosate, the active ingredient in Roundup® brand agricultural herbicides. Roundup® brand agricultural herbicides will kill crops that are not tolerant to glyphosate. Genuity®, Roundup® and Roundup Ready 2 Yield® are registered trademarks of Monsanto Technology LLC used under license. Individual results may vary, and performance may vary from location to location and from year to year. This result may not be an indicator of results you may obtain as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible.
