

# Advanced Genetics Soybean Varieties

## AG 4644S R2Y

Maturity:	4.6
Height:	Med. Tall
Plant Type:	Intermediate
Flower:	White
Pubescence:	Grey
Pod Color:	Brown
Hilum Color:	Buff
Seed Size:	2800/lb.
Recommended Row Width:	Wide or Narrow
Phytophthora Race Resistance:	Rps 1c.
Cyst Nematode Resistance:	R3, MR14 (PI 88.788)

AG 4644S R2Y is a high yielding mid group IV variety from Advanced Genetics with the RoundUp Ready 2 Yield gene stacked with STS. This is a medium tall variety with very good emergence. AG 4644S R2Y offers very good soybean cyst nematode resistance, an intermediate type growth habit (upward branching) and good tolerance to salt. This variety has a uniform and attractive field appearance. AG 4644S R2Y may be planted anywhere mid group IV varieties are adapted, however, performance will be best on clay or clay/loam soils.

### Agronomic Traits and Disease Resistance

Always follow grain marketing, stewardship practices and pesticide label directions. Roundup Ready® crops contain genes that confer tolerance to glyphosate, the active ingredient in Roundup® brand agricultural herbicides. Roundup® brand agricultural herbicides will kill crops that are not tolerant to glyphosate. Genuity®, Roundup® and Roundup Ready 2 Yield® are registered trademarks of Monsanto Technology LLC used under license. Individual results may vary, and performance may vary from location to location and from year to year. This result may not be an indicator of results you may obtain as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible.
