

# Advanced Genetics Soybean Varieties

## AG 5012N R2Y

Maturity:	5.0
Height:	Tall
Plant Type:	Narrow
Flower:	Purple
Pubescence:	Grey
Pod Color:	Brown
Hilum Color:	Imp. Black
Seed Size:	2900/lb.
Recommended Row Width:	Narrow
Phytophthora Race Resistance:	Rps 1c with Excellent tol.
Cyst Nematode Resistance:	MR3, MR14

AG 5012N R2Y is a new high yielding early group V variety from Advanced Genetics with the RoundUp Ready 2 gene. This variety is in a class by itself. It is the highest yielding early group V we have ever evaluated in our plots. Even though it is a tall variety, standability is good and AG 5012N R2Y may be planted on any soil type, drilled or rowed, and with great flexibility in respect to planting date. This variety may be planted anywhere group V varieties are adapted with the expectation of great performance.

### Agronomic Traits and Disease Resistance

5 (worst)    4                    3                    2                    (best) 1

Always follow grain marketing, stewardship practices and pesticide label directions. Roundup Ready® crops contain genes that confer tolerance to glyphosate, the active ingredient in Roundup® brand agricultural herbicides. Roundup® brand agricultural herbicides will kill crops that are not tolerant to glyphosate. Genuity®, Roundup® and Roundup Ready 2 Yield® are registered trademarks of Monsanto Technology LLC used under license. Individual results may vary, and performance may vary from location to location and from year to year. This result may not be an indicator of results you may obtain as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible.
